

## **Biography of Marica Karr**

Marcia Karr joined the Lost Pines chapter of the Texas Master Naturalist Program in 2014 and has been serving as President since January 2017. As a chapter member, she leads interpretive hikes, participates in plant and animal identification activities, and teaches both children and adults about nature through public events. Prior to that, she spent time learning about Texas plants through volunteer gardening at the Lady Bird Johnson Wildflower Center in Austin. She holds a Permaculture Design Course certification with special interest and focus on animal systems, and she is currently working towards becoming a certified wildlife tracker. In her free time, she is a beekeeper, a chicken-wrangler, and a totally-within-reason-not-at-all-crazy cat lover.
